

# Education Workforce Analysis Survey: Children and Young People's Mental Health and Wellbeing

---

This questionnaire is aimed at any member of the workforce supporting the mental health and wellbeing for children and young people. You may be working in a school, as part of the NHS or the local authority, in the voluntary sector or as an independent provider.

This questionnaire is intended to provide information required to understand the current workforce capacity and capability to meet the needs of children, young people and their families in each of the five THRIVE Framework needs based groupings.

Services are being redesigned to align with the [THRIVE Framework for system change](#) (Wolpert et al., 2019). The framework puts an emphasis on the promotion of mental wellbeing and early intervention.

## Introducing i-THRIVE

i-THRIVE is the implementation of the THRIVE Framework (Wolpert et al., 2019), using an evidence based approach to implementation to translate the principles of the THRIVE Framework into models of care that fit with local context. i-THRIVE has been designed to enable provision of services that move towards delivery of a population health model for child mental health. It strives to ensure continuous quality improvement of services, drawing from evidence based implementation science to ensure that children, young people and families get the best possible outcomes.

The THRIVE Framework was developed by a collaboration of authors from the Anna Freud National Centre for Children and Families and the Tavistock and Portman NHS Foundation Trust. The THRIVE Framework is an integrated, person centred and needs led approach to delivering mental health services for children, young people and families which conceptualises need in five categories; Thriving, Getting Advice and Signposting, Getting Help, Getting More Help and Getting Risk Support. Emphasis is placed on prevention and the promotion of mental health and wellbeing and clients are empowered to be actively involved in decisions about their care through shared decision making.

## The five THRIVE Framework needs based groupings:

- **THRIVING** Those whose current need is support in maintaining mental wellbeing through effective prevention and promotion strategies. They may benefit from prevention and promotion and communities implementing the THRIVE Framework should consider how best to support such initiatives at a system level.
- **GETTING ADVICE AND SIGNPOSTING** Those with mild or temporary difficulties and those with fluctuating or ongoing severe difficulties, who are managing their own health and not wanting goals-based specialist input.
- **GETTING HELP** Those CYP and families who would benefit from focused, evidence based help and support, with clear aims, and criteria for assessing whether these aims have been achieved.

- **GETTING MORE HELP** Those who need more extensive and specialised goals-based help. Distinct from Getting Help due to the need for extensive resource allocation.
- **GETTING RISK SUPPORT** Those who have not benefitted from or are unable to use help, but are of such a risk that they are still in contact with services. Risk management is the sole focus.

### **Consent and Confidentiality**

You are invited to participate in this survey designed by the National i-THRIVE Programme team to support the implementation of the THRIVE Framework across children and young people's mental health and wellbeing services.

This survey should take about 20 minutes to complete. Your participation in this study is entirely voluntary and you can withdraw at any time. You are also free to omit any question.

If you don't know the answer to any of the questions, don't worry, it is not expected that everyone will have all the answers. Please just tick the "don't know" option and move on.

The results of this survey will be used to inform a mapping document which we will share with participants so knowledge of 'what's out there' is shared across the system.

We will minimize any risks of confidentiality breach by limiting the people accessing the raw data to the Project Manager and the Project Officer. Raw data will be destroyed once the project has reached its completion.

Many thanks for contributing to the development and improvement of local services for children and young people's mental health. Your time and the information you provide is very much appreciated.
